

Duevy Business Model

Duevy on Bachs · Draft v2 · 29 Sep 2026 · Figures in ₦ · Bachs rates from docs.bachs.io/for-you/fees · Unconfirmed items marked [confirm with Bachs]

1. The business

Duevy lets reps and organisations collect dues, levies and event money from members, and lets members pay in one checkout. Duevy does not lend or hold members' money in this model. Each space is a Bachs connected account, members pay by **bank transfer** through Bachs checkout, funds land in the space's balance, and Duevy takes a fee per transaction. Duevy earns on **payment volume**: more spaces × more payers × higher-value collections.

2. Who pays what

Stream	Price	Paid by	Collected how
Dues checkout	2% + ₦20 flat , bank transfer only	Member (or space)	Checkout platform_fee , a fixed amount Duevy computes
Rep withdrawal	₦100 under ₦50,000; ₦200 at ₦50,000+	Rep / space	Transfer from the space to Duevy, or deducted from the payout [confirm: needs transfers capability]
Voting checkout	2.5% , bank transfer only	Voter (or organiser)	Checkout platform_fee

No cards. Checkouts are restricted to bank transfer, so spaces only need the **bank_transfer** capability. **Assumptions:** prices are all-in (they include Bachs' fee), and the ₦2,000 cap on the 2% part is kept, so dues fees top out at ₦2,020.

3. Unit economics

Bachs costs: bank transfer 1.5% capped ₦2,000 · NGN withdrawal ₦50 flat.

Dues payment	Duevy fee	Bachs cost	Duevy keeps
₦2,000	₦60	₦30	₦30
₦5,000	₦120	₦75	₦45
₦10,000	₦220	₦150	₦70
₦20,000	₦420	₦300	₦120
₦50,000	₦1,020	₦750	₦270
₦100,000	₦2,020	₦1,500	₦520
₦150,000	₦2,020	₦2,000	₦20

- The flat ₦20 keeps a small positive margin on very large payments, where the percentage cap would otherwise leave nothing.
- **Withdrawals:** ₦100 – ₦50 = **₦50** under ₦50k; ₦200 – ₦50 = **₦150** at ₦50k+.
- **Voting:** 2.5% – 1.5% = **1.0%** of each vote (₦1 on a ₦100 vote). No cap, so it scales with volume.
